

Mkomazi & Mvoti Water Projects

MKOMAZI WATER PROJECT
The purpose of the study is to investigate the first phase of the Mkomazi Water Project to such a level of detail that construction of the project can be started by about 2018

To take the MWP-1 to implementation the following four studies will run concurrently:

Studies by DWA

- Mkomazi Water Project Phase 1: Module 1: Technical Feasibility Study: Raw Water
- Mkomazi Water Project Phase 1: Module 2: Environmental Impact assessment

Study by UW

- Mkomazi Water Project: Technical Feasibility Study: Potable Water

It is anticipated that the feasibility studies will start early 2011.

MVOTI WATER PROJECT
The project will augment the water supply to the KwaZulu-Natal North Coast.
Previous studies indicated that the iSithundu Dam site is the preferred site for development.
It is anticipated that the feasibility studies will start by August 2011.
