

Group 2

Project Consolidate

How is the water services sector going to align with PC to address problems of capacity building?

- ◆ WS should not lose sight of the broader National Capacity Building Framework
- ◆ Hands on support around basic infrastructure delivery
- ◆ WSAs should be part of PC=gaps at the moment as focus is on LMs not necessarily WSAs
- ◆ B C relationships
- ◆ Mobilisation of resources and skill from Water Boards=PC should allow munix to articulate those needs
- ◆ Provincial level coordination= the sector has to be represented in the PMUs to raise the issues (not get left behind)

PC opportunities

- ◆ Raising awareness
- ◆ Strengthening cross sector collaboration
- ◆ Dedicated capacity within DPLG for PC at DDG level
- ◆ Provincial Coordinators for PC =DWAF

Recommendations cont.

- ◆ Sector to gather lessons coming out of PC and share them widely
- ◆ Coordination of support of sectors NB at Provincial level
- ◆ DPLG's role should be primarily to coordinate, but PC is the responsibility of all sector departments.
- ◆ Set up a water task team to engage with Provinces eg PPCTT
- ◆ PC teams to unpack the problems and bring in all key stakeholders (all services are interrelated)

Recommendations cont.

- ◆ Communication between PC task teams and munix has to improve
- ◆ PC has to be integrated with existing programs: for sustainability
- ◆ Munix have to own the process (since they are beneficiaries) for better results
- ◆ Creation of a water dedicated component within Provincial depts. to work with Regional DWAF (linkage)

Recommendations cont.

- ◆ Increased accountability for PC between the coordinating dept and the sectors (blurring) – responsibility for each sector rests with that sector
- ◆ Use existing performance management systems for PC= don't create new structures
- ◆ Strengthen pre-imbizo participation by sectors
- ◆ Sector partners to make available Service Delivery Facilitators to assist munix
- ◆ Post “imbizo” follow up to expedite implementation
- ◆ Mobilisation of resources eg civil society

Recommendations

- ◆ Perception management & understanding of Project Consolidate
